fitnext

Young PHD - Web & Data analyst

CDI – Paris (September 2014)

Fitnext is a french startup with roots in Brittany. It has raised capital from Nestadio and 3T Capital funds (Institut Mines Telecom) and is supported by Télécom Bretagne incubator. We care about promoting health.

Fitnext seeks a Web researcher-developer to work as a CDI with backend web development experience, interested in helping us build a cutting-edge big-data analysis/feedback web / mobile / tablet apps to improve personal fitness. Activities also include building and improving on our current applications with secure practices.

Technologies involved may include:

- Ruby / Ruby on Rails (if you have limited experience or similar experience, we can help you learn quickly - here and in other areas)

- Postgresql

- Experience with API design/use

- Apple HealthKit (and/or also similar/competing technologies e.g: Fitbit, Withings, Runkeeper)

- Php / Javascript / Jasmine

- Sencha / PhoneGap / Android / iOS development experience a big plus

- Cassandra / Hadoop / Hive / Spark / Mahout

- TDD/ Testing experience/ User eXperience and visualization a very nice plus

Work at our Paris office and telecommuting flexibility is also possible. To some degree we can cater the experience to your interests. English required.
